

Analysis of Student Satisfaction Survey:

A student's survey was conducted for the session 2023-2024, in which total 345 responses were recorded. 69% girls contributed in these responses and boys were 31% of total sample. All the streams participated in the survey. Many questions were asked from students in which they recorded their responses.

- When students were asked about the syllabus covered in the class, majority of students' i.e. more than 51% said that above 85% syllabus is completed by the teachers.
- They were asked about teacher's communication skills, more than 73% of students said that teacher's communication skills are very effective.
- Students are again satisfied with the internal evaluation process conducted by the teachers; maximum students that are more than 63% said that teachers are very fair with their evaluation process.
- More than 80% of the students agree that institution provide them multiple opportunities to learn and grow.
- The institution also provides many opportunities for them to enhance their learning skills. Teachers make sure that in the starting of course students should be informed what they can expect to learn after the course is completed.
- More than 90% teachers make the learning more easy and interesting for students through the applications of different illustrations and examples. Teachers are also playing a role of mentor by identifying the weaknesses of their students and help them overcome them and the students also agree with this that most of the teachers that is more than 80% are helping them improve themselves.
- College is organising different activities and competitions from time to time so that students could be encouraged to participate in extracurricular activities and most of the students that is more than 80% agree with this.
- Along with encouraging students for participating in different other activities teachers are also making efforts to inculcate soft skills, life skills and employability skills in students so that they can cope up with real world after leaving the college.
- To enhance the teaching learning skills, maximum teachers are using ICT tools such as LCD projector, multimedia etc.
- As far as overall quality of teaching learning process in college is concerned more than 80 percent of the students are agreed upon that the overall quality of teaching learning process in the college is very good and have agreed that college is providing them very good learning experience in the institute.
